ON THE INTERNATIONAL SCIENTIFIC CONFERENCE IN BRIEF

The International Scientific Conference "Management and Law 2022" will be held at the Faculty of Business and Law of the University "MB" in Belgrade, for the sixth time. The topic of the Conference "Management and Law 2022" is: *Globalization and modern business*. It will be held on September 16, 2022. See more at: <https://mip2022.mbuniverzitet.edu.rs/uvodna-rec/>. The international thematic scientific conference will begin with a plenary session aimed at achieving full interdisciplinarity and intensive interaction of different research disciplines, as well as the views and opinions of the authors of different professional and ideological provenance. After the plenary session, the International Thematic Scientific Conference will cover three sections: management, law and information technology. The subject of scientific discussion in the sections will be three general thematic areas, namely:

1. Contemporary trends in economics and management
2. The rule of law and legal state, the basis of modern society
3. Application of new IT technologies to support modern business processes of production, decision making and management

This International Scientific Conference contributes to and enables the exchange of opinions and views, and brings the right solutions in the field of management and business, economics, law and information technology. It brings together a large number of scientific and educational institutions, national and foreign manufacturers, users, transport organizations, etc. Scientific papers will be published in the journal "**MB University International Review**", which has been published in four issues every year since 2022.

The immediate goal of the Conference is to adequately locate and understand the problems of modern economy, management and business, law and the application of new technologies, as well as to provide concrete ideas and practical solutions for better and more efficient business. The Conference will be accompanied by short announcements of submitted and prepared works. Questions and answers in connection with the announcements are allowed. There will be a plenary discussion, round tables and sessions for the needs of students.

OBJECTIVE OF THE INTERNATIONAL SCIENTIFIC CONFERENCE

The goal of the International Scientific Conference "Management and Law 2022" is to bring together all scientists and business people who, in any way, deal with or use the results in the field of management and business, economics, law and information technology to see, understand and exchange scientific and professional knowledge, which would contribute to the proper selection, use and development of these fields of study. The application of new technologies has been bringing more and more dynamic changes on the entire global economic scene for a long time, and its contents are increasingly influencing the competitiveness of national economies. At the microeconomic level, new technologies are leading to a change in the economic structure and quality of production factors. They are an integral part of all concretization strategies, the concept of knowledge-based economy and innovation. The International Scientific Conference should provide concrete answers to the questions of how to apply new technologies in a quality way within the knowledge economy with a higher level of efficiency and effectiveness, all with the aim of increasing sustainable development, as well as diminishing risks of all kinds.
