4.	Layout	Header 20 mm, Footer 15 mm; different first page
5.	Font	Times New Roman

### 2.1. Section headings

Count the number of headings. Use max. two levels in your heading structure. Sections Acknowledgment, References and Correspondence are excluded from the heading count.

**Section heading** format: Times New Roman, 11 pt, uppercase, bold, align text left, single spacing, 0 pt both before and after paragraph, hanging 5 mm.

Follow the instructions for each type of reference. At the very end of the paper, in section Correspondence: author's first name (10 pt, sentence case), last name (10 pt, uppercase), title and scientific degree, name of the institution, address for correspondence and e-mail address. Please insert ("in line with text") pictures of the author and coauthors (resolution at least 300 dpi). Resize pictures if needed (20 x 25 mm)

## 3. TABLES AND FIGURES

### 3.1. Tables

Tables should be presented in the form shown in Table 1. The title of the table should be numbered and written above the table (Times New Roman, 10 pt, italic). Between text and table title, as well as between table and body text leave one blank line (10 pt). If a table is too wide to fit into one column (82.5 mm), you can put it in one page width column (170 mm), adding a new edit section („Section Break Continuous“). If a table is too long to fit into one page, the table number and headings should be repeated on the next page before the table is continued. Alternatively, the table can be spread over two consecutive pages turned 90° without repeating the headings.

### 3.2. Figures

The title of the figure should be numbered and written below the figure (10 pt, centered, italic). Before and after figure title, as well as between figure and body text leave one blank line (10 pt). All notations and lettering should be no less than 2 mm high. The use of heavy black, bold lettering should be avoided as they will look unpleasantly dark when printed. Pictures (resolution at least 300 dpi) should be inserted in the paper "in line with text".

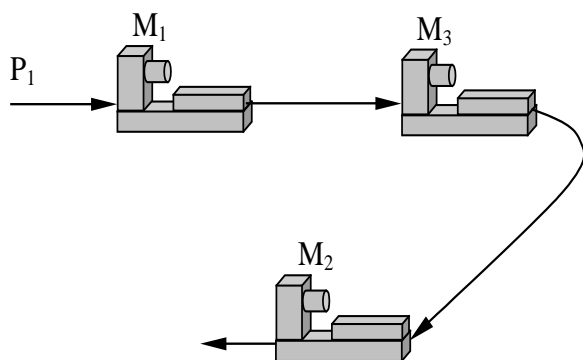

Fig.1. Good quality figure with clear lettering

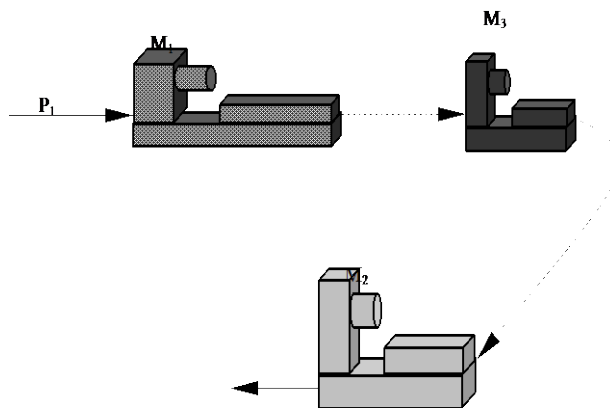

Fig.2. Bad quality, distorted figure with too small letters

## 4. EQUATIONS

Equations should be aligned left. Before and after the equation leave one blank line (10 pt).

$$S(t) = \lambda d^3 - \sum_{i=1}^f s_i \quad (1)$$

If they are numbered make sure that they are numbered consequently. Put the numbers in parentheses and use the right tab position (82.5 mm) in the line of the equation.

## 5. CONCLUSION

Please, remember the 'fine-tuning': do not end the page with a heading; do not start a page with an incomplete line; do not underline any part of the text. Please, try to align columns by horizontal at the top and bottom of each page.

The paper should be sent as an MS Word document by e-mail [mip2022@mbuniverzitet.edu.rs](mailto:mip2022@mbuniverzitet.edu.rs). The deadline for paper submission is 01 July 2022!
